

Advisory Councils & Forums at UGM 2011

Communications Advisory Council (CAC)

This forum brings together marketing and communications professionals to discuss ideas for promoting Epic products and projects – externally and internally. Come prepared to share recent experiences with your peers and exchange ideas for future projects.

CAC is designed for marketing and communications leaders.

Data Courier Forum

The Data Courier Forum is an opportunity for customers to learn about the Data Courier and to network with other customers that are using this data migration tool. The forum includes Epic presentations of current and upcoming Data Courier functionality, a review of the potential project list, and the opportunity for customer feedback on both the current state of the tool and the direction of new development.

The Data Courier Forum is intended for Epic customers using or installing the Data Courier.

Directors and Associates Advisory Council (DAC)

Participants will discuss healthcare issues with industry peers, gaining new perspectives on difficult decisions and common challenges. You will also learn more about Epic's strategic direction and plans.

DAC is designed for Directors, Associate/Assistant VPs and Associate/Assistant CIOs only.

Financial Advisory Council (FAC)

FAC includes tracks of breakout sessions for financial directors, payors, hospital billing, professional billing, ADT and registration. Participants share experiences and learn new ways to improve system management.

FAC is designed for directors, managers, supervisors and Epic project team members from Resolute Hospital Billing, Resolute Professional Billing, ADT, Prelude and Tapestry clients.

HIM/identity Forum

The HIM/Identity Forum is an opportunity to share ideas and experiences related to implementation and support of HIM and EMPI management processes. Hear the latest from Epic developers and pick up best practices from long-time users of the system.

The HIM Forum is designed for HIM and EMPI supervisors, directors and project team members from licensed HIM, EpicCare Inpatient, EpicCare Ambulatory and Resolute Hospital Billing clients only.

Meaningful Use Forum (MU)

This forum provides an opportunity for organizations using EpicCare to interact, exchange ideas and hear presentations on preparing for and achieving Meaningful Use. Join others leading or involved in the Meaningful Use efforts at their organizations and hear from those who have achieved compliance and completed attestation.

Nursing Advisory Council (NAC)

Share experiences, exchange ideas and get updates on clinical application development that pertains to nursing's unique challenges. User presentations and breakout sessions will explore both inpatient and ambulatory issues.

NAC is designed for EpicCare Clinical System (Inpatient, Ambulatory, ASAP) users.

Perioperative Forum

This interactive forum connects OpTime and Epic Anesthesia users for a day of focused discussion. Learn from perioperative success stories and hear from Epic developers about features planned for future release.

The Perioperative Forum is designed for managers, project team members and super users from licensed OpTime and Epic Anesthesia clients.

Pharmacy Advisory Council (PharmAC)

This council sets the stage for pharmacists to exchange ideas, collaborate on shared challenges and contribute to the continued development of the Willow Inpatient Pharmacy System. The council will include user presentations, design discussions and previews of new Willow features.

PharmAC is designed for Willow Pharmacy users only.

Physicians Advisory Council (PAC)

Exchange practical knowledge unique to the physician experience in Epic software. PAC features user presentations, breakout discussions and upcoming functionality previews of particular interest to our physician community.

PAC is designed for EpicCare Clinical System (Inpatient, Ambulatory, ASAP) physicians only.

Project Managers Advisory Council (PMAC)

PMAC provides a unique forum for sharing project successes and thinking through common challenges with your peers. You'll also get updates on new Epic product development and applications.

PMAC is designed for project managers.

Radiant Forum

The Radiant Forum is an opportunity for Epic's radiology information system customers to share ideas and experiences related to installing and supporting Radiant. The Forum includes customer presentations, information on future development and an environment for networking with other radiology customers.

The Radiant Forum is designed for Radiant application coordinators, project managers and radiology managers from licensed Radiant clients.

Scheduling Advisory Council (SAC)

Join fellow Cadence users for in-depth discussions on new and upcoming scheduling features, experiences from peer organizations and opportunities to learn more about this application.

SAC is designed for Cadence users only.

Security Forum

The interactive forum will give security coordinators and security officers an opportunity to discuss strategies related to user provisioning and security management. This will be a good opportunity to learn from the experiences of other clients as well as provide input into Epic's security architecture. Also, Epic developers will be on hand to demonstrate new features planned for future releases.

The Security Forum is designated for security coordinators and managers that directly work with user provision, security maintenance and auditing within your Epic system.

Training Advisory Council (TAC)

The Training Advisory Council is a forum for trainers to share their knowledge and experience with each other through customer driven presentations, panels, group discussion, and general networking. The trainer experience includes folks that are in various stages of an implementation to live customers.

TAC is designed for application trainers and training managers who are involved in any of the various Epic applications.
